EXTERNAL VIEWS &
WIRING DIAGRAMS

EMBRACO is a global cooling specialist and leader in the refrigeration market, aiming to combine technology and services, engineered around customers' needs.

Our mission is to provide innovative solutions for a better quality of life. We are passionate about technology and constantly investing in new developments, energy efficiency improvements, sustainability of our products and processes, combined with premium quality, operational excellence, and business knowledge to support our customers to reach their goals and even exceed the most restrictive international standards.

What makes the difference when you choose Embraco?

Thanks to our wide range of products combining hermetic and scroll compressors, condensing units and electronics, we can provide ultimate solutions for Household, Light Commercial and Aftermarket segments.

Our global footprint, with factories and offices located in Brasil, China, Italy, Mexico, Russia, Slovakia and United States, assures premium service level and runs flexible business in more than 80 Countries all over the world.

Our 500 professionals in R&D, laboratories and tech centers in 4 continents assure a constant focus and wide experience to support customers in the development of their solution.

More than 11,500 employees

More than 400 professionals in R&D

Production capacity of over 38 million compressors per year

More than 500 million products produced to date

More than 1,200 patents worldwide

Business conducted in more than 80 countries

R&D laboratories on 4 continents

embraco

transforming insights into great cooling experiences

ABOUT EMBRACO

HIGH EFFICIENCY

Energy efficiency is the base for all our product development. This means producing compressors that consume each time less energy and less raw material in manufacturing at the same time maintaining **Embraco** brand quality.

Thus, we continuously invest in research and development to create products that are more efficient and silent and do not harm the environment.

embraco

TROPICAL AND SUPERTROPICAL

All the Embraco Condensing Units are tested for tropical temperatures up to 43°C.

Available range tested for supertropical temperatures up to 48°C

EU ECODESIGN REGULATION

THE COMMISSION REGULATION (EU) DOSSIER NO 11898/14 IMPLEMENTING DIRECTIVE 2009/125/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL WITH REGARD TO **ECODESIGN REQUIREMENTS** FOR PROFESSIONAL STORAGE CABINETS, **CONDENSING UNITS** AND PROCESS CHILLERS WILL **ESTABLISH MINIMUM EFFICIENCY PERFORMANCE STANDARDS (MEPS)** FOR NEW PRODUCTS BEING PLACED ONTO THE EU MARKET AS OF JULY 1ST 2016.

The Ecodesign Directive aims to reduce the environmental impact of energy related products during their entire lifetime, it provides a framework with specific and mandatory requirements for improving product quality and environmental protection, reducing energy and resources consumption and significantly contributing to the EU's 2020 energy efficiency objective.

In addition to this, the Energy Labelling gives clear information about the energy consumption and performance of specified appliances, helping consumers and end users to select energy efficient products allowing them to make informed purchasing decisions..

The EU legislation on Ecodesign is an effective tool for eliminating the least performing products from the market. As regards to the refrigeration systems, this regulation shall apply to professional refrigerated storage cabinets and blast cabinets, condensing units operating at low and medium temperature (monoblock units or split units are excluded). If, for instance, Ecodesign requirements for domestic refrigerators do not respect the Ecodesign Directive criteria, any refrigerator which does not comply with these requirements will not be CE marked and therefore cannot be sold in the European Union.

EFFECTIVELY JULY 1ST, 2016,
THE ENTIRE EMBRACO CONDENSING UNITS RANGE
WILL MEET THE STANDARDS REQUIRED
BY THIS NEW REGULATION,
ENSURING THE CONFORMITY OF ITS PRODUCTS.

THE ECODESIGN REQUIREMENTS

The coefficient of performance (COP) and the seasonal energy performance ratio (SEPR) of the condensing units shall not drop below the values indicated in the following table:

OPERATING TEMPERATURE	RATED CAPACITY P _A	APPLICABLE RATIO	VALUE
MEDIUM	0,2 kW ≤ P _A 1 kW	COP	1,20
	1 kW ≤ P _A 5 kW	COP	1,40
	5 kW ≤ P _A 20 kW	SEPR	2,25
	20 kW ≤ P _A 50 kW	SEPR	2,35
LOW	0,1 kW ≤ P _A 0,4 kW	COP	0,75
	0,4 kW ≤ P _A 2 kW	COP	0,85
	2 kW ≤ P _A 8 kW	SEPR	1,50
	8 kW ≤ P _A 20 kW	SEPR	1,60

Note: Product data - check pages 20 - 23

MULTICOMPRESSORS SOLUTION	
AVAILABLE WITH 2 OR 3 COMPRESSORS	
	

UEMT		AVAILABLE FOR:
	• Low noise • High efficiency level • Wide application range • Compact size	R134a R404A/R507/R452A R290
		APPLICATION:
		LBP, M/HBP
		COMPRESSORS FROM:
		3,4 CC TO 7,69 CC

UNE/UNEK/UNEU		AVAILABLE FOR:
	• Low noise • Low vibrations • High reliability in severe working conditions	R134a R404A/R507/R452A R290
		APPLICATION:
		LBP, M/HBP
		COMPRESSORS FROM:
		6,2 CC TO 16,8 CC

High efficiency versions of UNEK models (UNEU) available on demand

UNT		AVAILABLE FOR:
	• High efficiency level • Very low sound level • High cooling capacity at low evaporating temperatures	R134a R404A/R507/R452A
		APPLICATION:
		LBP, M/HBP
		COMPRESSORS FROM:
		14,5 CC TO 27,8 CC

UNJ		AVAILABLE FOR:
	• Small size platform • High energy efficiency • Reduced noise level	R134a R404A/R507/R452A
		APPLICATION:
		LBP, M/HBP
		COMPRESSORS FROM:
		21,7 CC TO 34,4 CC

SLIDING UNITS STANDARD RANGE		AVAILABLE FOR:
	• Low noise • High efficiency level • Wide application range • Compact size	*R134a R404A/R507/R452A
		APPLICATION:
		LBP, M/HBP
		* only LBP

SLIDING UNITS EXTENDED RANGE		AVAILABLE FOR:
	• Low noise • High efficiency level • Wide application range • Compact size	*R134a R404A/R507/R452A
		APPLICATION:
		LBP, M/HBP
		* only LBP

MULTICOMPRESSORS

A new entry into Embraco's Condensing Units: Multicompressors architecture is the smart solution to have small size platform, high efficiency and reduced noise level.

MULTICOMPRESSORS SOLUTION
• Small size platform
• High energy efficiency
• Reduced noise level
AVAILABLE FOR: R134a, R404A/R507/R452A
APPLICATION: LBP, M/HBP
COMPRESSORS FROM: 21,7 CC TO 34,4 CC

PRODUCT FEATURES
extended range up to 8,5kW
available for R134a, R404A
2 or 3 compressor units
compact size
lower energy consumption
power control: possibility to switch on or switch off compressors based on required cooling capacity
doublestage delay unit (timer)
gradually switching of high loads
IoT control elements

CONDENSING UNIT BILL OF MATERIAL CODE

TECHNICAL INFORMATION

OPERATING ENVELOPE

R134a

Note: usage of condensing unit outside the intended working range cannot make use of the warranty, or should be consulted with Technical support.

R404A
R507
R452A
R290

Note: usage of condensing unit outside the intended working range cannot make use of the warranty, or should be consulted with Technical support.

APPLICATIONS

LBP	LOW BACK PRESSURE	APPLICATIONS:
	Evaporating temperature lower than -20° C	refrigerators,frozen food cabines, frozen food display cases, display windows, etc.
MBP	MEDIUM BACK PRESSURE	APPLICATIONS:
	Evaporating temperature between -20° C and 0° C	fresh food cabinets, drink coolers, ice makers, etc.
M/HBP	MEDIUM / HIGH BACK PRESSURE	APPLICATIONS:
	Evaporating Temperature between -20° C and +10° C	coolers, merchandisers, etc.
HBP	HIGH BACK PRESSURE	APPLICATIONS:
	High evaporating temperatures between -15° C and +10°C	fresh food cabinets, bottle coolers,dehumidifiers, etc.

ASHRAE	LBP	-23.3	32	3K	32
	M and HBP	7,2	32	3K	32

EXPANSION DEVICE

C	Capillary Tube.
V	Expansion Valve.

MOTOR TORQUE

LST	(Low Starting Torque) Compressor with RSIR - RSCR - PSC electrical motor for sysyems with capillarity tube and with equalized pressures at start up.
HST	(High Starting Torque) Compressor with CSIR - CSR and 3ph electrical motor for sysyems with capillarity equalized or not equalized pressures at start up.

ELECTRICAL MOTOR TYPES

RSIR	Resistance Start – Inductive Run This motor type , used in the compressor of small power, has a low starting torque (LST) and must be applied only to capillary tube systems where the pressures equalize. The motor is characterized by a start winding with high ohmic resistance and must be disconnected when it reaches the stabilized rotational speed. An electromagnetic relay, calibrated for the motor current, disconnects the start winding at the end of the start up. An alternative to the electromagnetic relay is, for some models, a PTC solid state-starting device.
RSCR	Resistance Start – Capacitive Run Similar to RSIR motor version but uses a PTC solid state starting device and a permanent connected run capacitor to improve its efficiency.
CSIR	Capacitive Start – Inductive Run Similar to RSIR motor, with a different start winding in series with a start capacitor of suitable capacitance to get a high starting torque.
CSR	Capacitive Start & Run CSR version with capacitive run and start windings. Same as PSC motor but with a start capacitor in series with the start winding. A potential starting relay, calibrated for each motor, disconnects the start capacitor at the end of the start. The motor is characterized by a high starting torque (HST) and high efficiency.
PSC	Permanent Split Capacitor: PSC version with capacitive run winding. This motor is characterized by the run capacitor permanently connected in series with the start winding; both remain connected even after the motor starts. The starting torque is enough to guarantee that the compressor starts only with balanced pressures in capillary tubes systems or with a pressure equalizer.
3Ø	Three Phase Three-phase windings with star connections.
